

NOTICE TO USERS OF SUDAS DESIGN MANUAL

Before using the design standards in this manual, the Project Engineer must check with the Jurisdictional Engineer of the Jurisdiction in which the project will be designed and/or constructed for any special provisions that modify the standards contained herein. The Jurisdiction will review all submittals for compliance with the specific local design criteria, procedures, and regulations. The Jurisdiction shall have no obligation to verify the certified engineering calculations, method of design, and as-built drawings required to be submitted. Acceptance of plans and issuance or approval of any permit should not be interpreted as guaranteeing the performance of the engineering documents or alleviating the Project Engineer of being responsible for the accuracy and adequacy of the plan. Approval by the Jurisdiction does not relieve the Project Engineer from the responsibility of ensuring that the calculations, design, and plans are accurate and are in compliance with this manual as may be modified by the local Jurisdiction standards and fit the needs of a particular project based on sound engineering principles.
