Chapter 14 - Trenchless Construction

14A General Information

14A-1-----General Information
A. Purpose..... 1
B. When to Consider Trenchless Construction..... 1
C. Cost Analysis of Trenchless vs. Open Cut Construction..... 1
D. Definitions.....1
14A-2-----Commonly Used Trenchless Technologies
A. Techniques Common in the United States.....1
B. Techniques Common in Iowa..... 1

14B New Construction

14B-1-----Planning a Bore
A. Bore Pit Locations..... 1
B. Manhole Locations..... 1
C. Bore Lengths.....1
D. Acceptable Tolerances..... 1
E. Information to Provide to Contractor..... 2
F. Risk Allocation.....2
G. Drawing on Contractor’s Expertise..... 3
14B-2-----Methods of New Construction
A. Trenchless Methods for New Construction..... 1
B. Expected Service Life for New Construction..... 1
C. Auger Boring..... 1
D. Compaction Boring.....3
E. Pipe Ramming..... 5
F. Slurry Methods..... 7
G. Horizontal Directional Drilling.....8
H. Pipe Jacking and Utility Tunneling.....11
I. Microtunneling..... 14

14C Rehabilitation

14C-1-----Evaluation of Existing Conditions for Rehabilitation
A. Introduction.....1
B. Evaluating the Condition of the Existing System..... 1
C. Selection of a Rehabilitation Technique.....2

14C Rehabilitation (Continued)

14C-2-----Pipeline Rehabilitation

- A. Cured-in-place Pipe (CIPP)..... 1
- B. Fold-and-formed Pipe (FFP) and Deformed Reformed Pipe (DRP) Lining..... 13
- C. Sliplining..... 14
- D. Pipe Bursting..... 16

14C-3-----Manhole Rehabilitation

- A. Introduction..... 1
- B. Corrosion Resistant Chimney Sealant..... 1
- C. Centrifugally Cast Mortar..... 1
- D. In-situ Manhole Replacement..... 3

14D References

14D-1-----References
